ELSEVIER

European Journal of Operational Research 95 (1996) 683–685

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 95

1 Materials coordination in stochastic multi-echelon systems (Invited Review)
G.J. van Houtum, K. Inderfurth and W.H.M. Zijm

24 A comparison of neural networks and linear scoring models in the credit union environment
V.S. Desai, J.N. Crook and G.A. Overstreet, Jr.

38 Optimal level schedules in mixed-model, multi-level JIT assembly systems with pegging
G. Steiner and J.S. Yeomans

53 Order splitting in continuous review (Q, r) inventory models
R.M. Hill

62 Fuzzy bicriteria multi-index transportation problems for coal allocation planning of Taipower
G.-H. Tzeng, D. Teodorović and M.-J. Hwang

73 A general approximation for the single product lot sizing model with queueing delays
M.R. Lambrecht and N.J. Vandaele

89 Competitive capacity expansion under demand uncertainty
T.C.A. Bashyam

115 Preference modelling by estimating local utility functions for multiobjective optimization
J.-B. Yang and P. Sen

139 Stochastic dominance tests for ranking alternatives under ambiguity
A. Langewisch and F. Choobineh

155 On the connectedness of optimum-degeneracy graphs
P. Zörnig and T. Gal

167 A stochastic and dynamic routing policy using branching processes with state dependent immigration
J.D. Papastavrou

178 Multicommodity flow models for spanning trees with hop constraints
L. Gouveia

191 Random search in the one-dimensional cutting stock problem
R. Vahrenkamp

201 New polynomial bounds for matroidal knapsacks
L. Amado and P. Barcia

211 Approximating probability density functions and their convolutions using orthogonal polynomials
R.D. Badinelli

231 Ranking in quadratic integer programming problems
R. Gupta, L. Bandopadhyaya and M.C. Puri

237 A note on hashing functions and tabu search algorithms
W.B. Carlton and J.W. Barnes

241 Multi-echelon systems: A service measure perspective (Invited Review)
E.B. Diks, A.G. de Kok and A.G. Lagodimos

264 Probabilistic, fuzzy and rough concepts in social choice
H. Nurmi, J. Kacprzyk and M. Fedrizzi

278 Optimal segmentation of projects – Schedule and cost considerations
A. Shtub and T. Raz

284 Dynamic project selection and funding under risk: A decision tree based MILP approach
K. Heidenberger

299 Optimal ordering policies in inventory systems with random demand and random deal offerings
H. Gurnani

313 The EOQ repair and waste disposal model with variable setup numbers
K. Richter
325 Global and variable cost manufacturing systems
D.B. Rosenfield
344 Inspection sequencing and part scheduling for flexible manufacturing systems
J. Lee and F.F. Chen
356 Genetic algorithms for the two-stage bicriteria flowshop problem
V.R. Neppalli, C.-L. Chen and J.N.D. Gupta
374 An exploration of models that minimize leadtime through batching of arrived orders
P.F.J. Tielemans and R. Kuik
390 Dominance stochastic models in data envelopment analysis
Z. Huang and S.X. Li
404 Lower bounding aggregation and direct computation for an infinite horizon one-reservoir model
B.F. Lamond and P. Lang
411 Random generation of tournaments and asymmetric graphs with given out-degrees
I. Charon, A. Germa and O. Hudry
420 QUAD01: A data-structured implementation of Hansen's quadratic zero–one programming algorithm
W.J. Comley
427 Minimizing the schedule length for a parallel 3D-grid precedence graph
E. Bampis, J.-C. König and D. Trystram
439 Multidimensional scaling: An analysis of 1980–1990 computers
R. Giladi, Y. Spector and A. Raveh
451 New mathematical properties of the Banzhaf value
I. Dragan
464 Book Reviews

467 Risk analysis techniques and their application to software development (Invited Review)
J.C. Bennett, G.A. Bohoris, E.M. Aspinwall and R.C. Hall
476 A dual ascent approach to the fixed-charge capacitated network design problem
J.W. Herrmann, G. Ioannou, I. Minis and J.M. Proth
491 Construction of all DEA efficient surfaces of the production possibility set under the Generalized Data Envelopment Analysis Model
G. Yu, Q. Wei, P. Brockett and L. Zhou
511 Determining the optimal return on investment for an advertising campaign
P.J. Danaher and R.T. Rust
522 Optimal hedging under output price uncertainty
B.G. Arshanapalli and O.K. Gupta
537 A sequential integer programming method for discontinuous labor tour scheduling
M.J. Brusco and T.R. Johns
549 Optimal yield improvement in multi-stage manufacturing systems
M. Barad and G. Bennett
566 A flexible approach to (re)configure Flexible Manufacturing Cells
Z.M. Mohamed
577 The impact of preventive maintenance on system cost and buffer size
R.D. Meller and D.S. Kim
592 A review of extensive facility location in networks
J.A. Mesa and T.B. Boffey
604 An inventory model for deteriorating items with stock-dependent demand rate
B.C. Giri, S. Pal, A. Goswami and K.S. Chaudhuri
611 A fuzzy mathematical model for the joint economic lot size problem with multiple price breaks
S.M. Lam and D.S. Wong
623 Common volatility in major stock index futures markets
G.G. Booth, M. Chowdhury and T. Martikainen
631 Setup minimising conditions in the trim loss problem
A. Diegel, E. Montocchio, E. Walters, S. van Schalwyk and S. Naidoo
641 Design of double CUSUM quality control schemes
K.-H. Waldmann

649 Applications of the extent analysis method on fuzzy AHP
D.-Y. Chang
656 A simulation-based evaluation of the approximate and the exact eigenvector methods employed in AHP
N. Vinod Kumar and L.S. Ganesh
663 Coordinated search for an object hidden on the line
D.J. Reyniers
671 An extended formulation approach to the edge-weighted maximal clique problem
K. Park, K. Lee and S. Park
